

In-House CME

When Summer Bites Back: Pediatric Foot Lesions, Warts, and Water Hazards

07/22/2026 7:00 PM Eastern

Live Virtual Webinar

This CME program on summer-related pediatric foot conditions equips clinicians with a focused, practical approach to evaluating and managing skin lesions, warts, and water-associated foot injuries in children. Participants will review common seasonal presentations, including traumatic lacerations, puncture wounds, plantar verrucae, and skin infections and lesions related to pools, lakes, and coastal environments or daycare, with emphasis on distinguishing benign conditions from those at risk for complications. Learners will also examine evidence-based strategies for prevention, early recognition, and appropriate treatment, integrating wound assessment, infection risk stratification, and patient-family education. By combining seasonal epidemiology with pediatric-specific management principles, this program empowers clinicians to reduce morbidity, prevent missed diagnoses, and deliver timely, child-centered care during the summer months.

Learning Objectives:

Identify common physeal and apophyseal sports injuries affecting skeletally immature athletes and recognize their characteristic clinical presentations.

Describe the biomechanical and physiological mechanisms that contribute to overuse injuries in the pediatric and adolescent athletic population.

Apply evidence-based acute and chronic management strategies for the treatment of common pediatric sports-related overuse injuries.

Analyze patient-specific and sport-specific factors that may delay recovery or increase the risk of recurrent injury in skeletally immature athletes.

Develop multidisciplinary treatment plans that incorporate the roles of athletic trainers, physical therapists, physicians, and other healthcare professionals to optimize recovery and safe return to sport.

Intended Audience: Podiatrists

Fees: \$ 0.00

Refund Policy: N/A

In-House CME is accredited by the Council on Podiatric Medical Education as a provider of continuing education in podiatric medicine. In-House CME has accredited this activity for a maximum of 1.0 continuing education contact hour.

No commercial interest provided financial support for this continuing education activity.

Panelists

Mark Solomon, DPM

Dr. Mark Solomon is a partner of The Pediatric Orthopedic Center in Cedar Knolls, New Jersey. He is the director and founder of the Pediatric Foot and Ankle Fellowship, which is the first DPM/MD/DO fellowship with a pediatric orthopedics group. Dr. Solomon is managing and founding partner of POC Creative Works, LLC which is a think tank of pediatric orthopedic surgeons with the combined goal of innovation, research and development of products that help children rehabilitate and recover from orthopedic illnesses and injuries.

Disclosures: Dr. Solomon is a consultant for Stryker, Orthofix, and Ossio
