

Ankle - Foot Orthoses Coding and Documentation Update

11/19/2026 6:00 PM Eastern

Live Virtual Webinar

Providing ankle-foot orthoses, such as cast walkers and ankle braces, directly to patients at the point of care can improve outcomes, improve patient satisfaction, and improve practice efficiency. And, just like every other service, the provision of ankle-foot orthoses carries with it coding, compliance, and documentation considerations. This session will focus on those coverage guides, appropriate coding, and compliant documentation. For those already providing this service, this session will help to ensure compliance. For those not currently providing this service, this session will help in implementing this powerful aspect of patient care in a compliant manner.

Learning Objectives:

1. Differentiate between "prefabricated" and "custom fabricated" ankle-foot orthoses.
2. Create a progress note that establishes the medical necessity of a pneumatic walking boot.
3. Differentiate between "prefabricated off-the-shelf" and "prefabricated custom fitted" ankle-foot orthoses.

Intended Audience: Podiatrists

Fees: \$ 0.00

Refund Policy: N/A
