

Surgical Management and Complex Cases

10/27/2026 7:00 PM Eastern

Live Virtual Webinar

Not every wound heals with conservative care alone. While holistic assessment and host optimization are foundational, some wounds reach a point where procedural intervention becomes the turning point between stagnation and healing. The challenge for clinicians is determining when to escalate care surgically and when continued conservative therapy remains appropriate.

This episode examines how surgical and bedside procedural approaches—including debridement, incision and drainage, offloading procedures, tissue reconstruction, and biologic graft placement—can be strategically used to alter the wound environment and accelerate healing. Faculty will discuss real-world cases in which procedural decisions prevented limb loss, shortened healing timelines, or corrected mechanical barriers to recovery.

Participants will learn how to integrate surgical judgment into multidisciplinary wound care, identify clinical scenarios where procedural intervention is indicated, and understand how surgical decision-making fits within the broader philosophy of holistic wound management.

Learning Objectives:

Intended Audience: Podiatrists

Fees: \$ 0.00

Refund Policy: N/A

In-House CME is accredited by the Council on Podiatric Medical Education as a provider of continuing education in podiatric medicine. In-House CME has accredited this activity for a maximum of 1.0 continuing education contact hour.

No commercial interest provided financial support for this continuing education activity.

Panelists

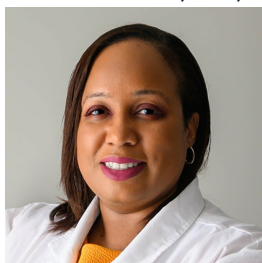

Traci Kimball, MD

Traci Kimball, MD, is a vascular medicine and wound care specialist with nine years of experience. She holds degrees from The University of Texas at Austin and The University of Texas Health Sciences Center at San Antonio, and is currently pursuing an MBA in Healthcare Management from Daniel's College of Business at Denver University. A general surgeon by training, Dr. Kimball has additional qualifications in vascular medicine and wound care. She is the Founder of WISH Skin Labs B-corp and actively promotes value-based, patient-centered care through community outreach and education. Dr. Kimball has held leadership roles, including Daniel's School of Business Student Ambassador and Region 3 Medical Student Delegate to the American Medical Association.

Disclosures: Dr. Kimball is a consultant and on the speakers bureau for Encoll Corp. Histologics, LLC; receives grant/research support from Kane Biosciences; is a stock shareholder of Ekagra Health, Fruitstreet Health, and Clara Care NuEyes; and is an employee of the Wish Clinic.

Maria Goddard, MD, CWS, MAPWCA

Maria Goddard, MD, CWS, MAPWCA, is a Midwest-based board-certified wound care specialist with advanced training in General and Burn Surgery. Certified by both the American Board of Wound Management and the American Board of Wound Healing, she is actively involved in the Association for the Advancement of Wound Care and the American Burn Association. Dr. Goddard is dedicated to bridging care gaps due to regulatory and resource differences, with professional interests in burn care, geriatrics, global health, telemedicine, and education.

Disclosures: Dr. Goddard is a consultant for Essity, Solvatum, Hartmann, Tissue Health Plus, and Medline. She receives honorariums from HMP Global and Relias; is an employee of CVS, and receives royalties from Medsmastery.
